

Our job is to help you do yours

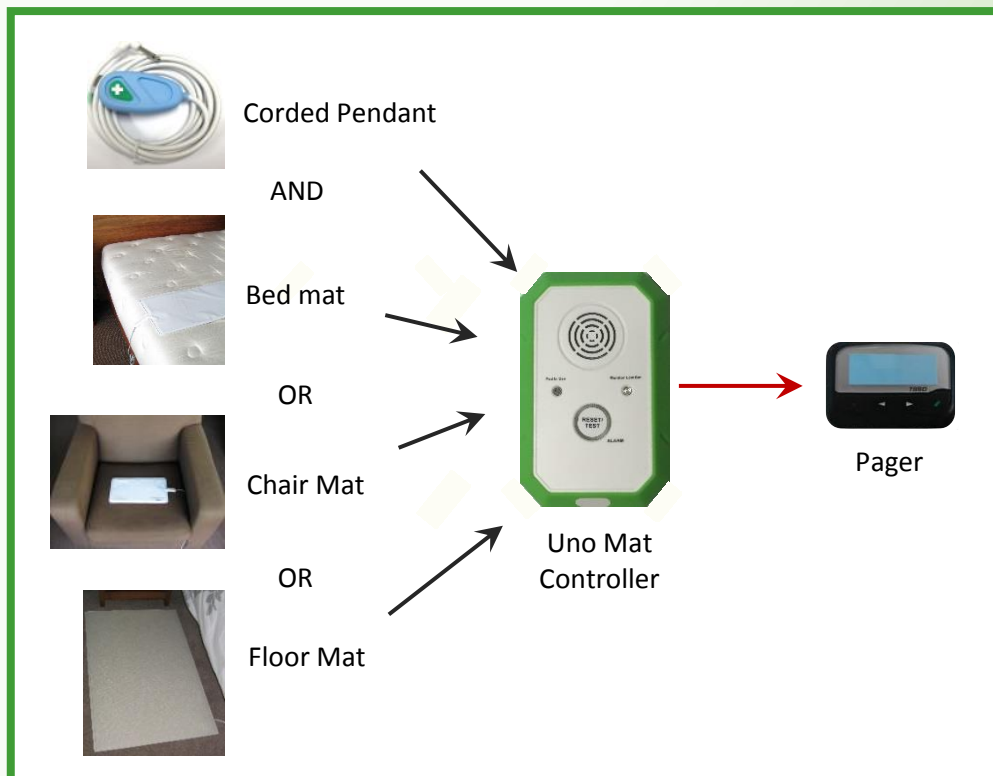

INDUNA Uno – Home Care

You probably want to care for your aged or sick loved one in the comfort of their (or your) home, and be assured of their safety too.

That's what drove us to create this individual home care solution.

With this Home care system, you receive a message direct to your pager alerting you when the person gets out of bed or requires assistance.

Choose the mat to suit your needs, add it to the pendant, pager and controller, and you're all set.
