Fall Protection

Out of Bed PIR Sensor

EL-ANC-PIR

Description

The passive infra-red sensor detects movement as the user leaves the bed, at which point it sounds an alarm.

This can be used as a standalone alarm unit or it can be connected to the nurse call system.

Features

Standalone – battery operated, or 12V power supply

Connects to any existing nurse call system

Low battery indicator

Wireless Out of Bed PIR Sensor

EL-ANC-HRY/PIR/ST

Description

The passive infra-red sensor detects movement as the user leaves the bed, at which point it sounds an alarm.

This can be used as a standalone alarm unit or it can be connected to the nurse call system.

Being wireless, this system can be transferred between users as required.

Features

Standalone – battery operated, or 12V power supply

Connects to any existing nurse call system

Low battery indicator
